

The PSP-Series is single output, 200W, programmable switching DC power supply OVP, OCP, OTP, and OPP protect PSP and loads from unexpected conditions. Large LCD panel with simultaneous output/parameter view, key lock feature for preventing improper use, and output power setting in addition to the standard voltage/current, provide comfortable operation. SCPI command set and Labview driver access through RS-232C interface provide remote control and ATE software development capability. The simple, safe, and inexpensive PSP-Series is suitable for generic bench-top applications in laboratories and educational institutions.

PSP-Series

FEATURES

- * LCD Display
- * Output ON/OFF Control
- * 3 Steps Fan Speed Control
- * Setting of Voltage/Current/Power
- * Key Lock to Avoid Error Operation
- * Normal , +% & -% Output Operation Key
- * Standard Interface: RS-232C
- * Optional European Jack Type Terminal
